Marriott Hotels' Cutting-Edge Wireless Charging Stations Deploy IDT Chips

Kube Systems Leverages the IDT Transmitters for the Hotel Brand's State-of-the-Art Charging Stations

SAN JOSE, Calif.--(BUSINESS WIRE)-- Integrated Device Technology, Inc. ([IDT](#)[®]) (NASDAQ:IDTI) today announced that Kube Systems selected an IDT wireless power transmitter for its cutting-edge wireless charging stations available in select Marriott Hotels. Placed in dozens of Marriott Hotels properties around the United States, the charging cubes serve as the latest proof point of the growing adoption of wireless power in a variety of applications.

Kube Systems deployed the IDT [P9036](#), a highly integrated single-chip Wireless Power Consortium-compliant (Qi standard) transmitter, for its magnetic induction charging stations found in Marriott Hotels from coast to coast.

"We teamed with IDT because of the company's expertise and experience bringing this type of innovative technology to consumers," said Dave Weinstein, vice president at Kube Systems. "As a result, thousands of Marriott customers have first-adopter access to the convenience of wireless charging."

"Before Kube Systems chose IDT as the provider of its wireless charging chips, we had to demonstrate we have the technology and know-how to ensure their success," said Arman Naghavi, vice president and general manager, Analog and Power Division. "After 12 months of working closely to develop the product, the sleek Kube Systems stations are testament to IDT's ongoing leadership in wireless charging."

[About IDT](#)

Integrated Device Technology, Inc. develops system-level solutions that optimize its customers' applications. IDT uses its market leadership in timing, serial switching and interfaces, and adds analog and system expertise to provide complete application-optimized, mixed-signal solutions for the communications, computing and consumer segments.
