Employee Communication

Summary of Key Compensation Treatments in Renesas Transaction

There are many questions among employees regarding the anticipated treatment of employee equity grants and certain aspects of employee compensation. This summary is intended to provide a brief and general explanation regarding the most common questions that we are receiving about employee compensation. We understand there will continue to be many questions regarding compensation and benefits going forward. Keep in mind that we do not expect the close to occur until sometime in the first half of 2019. There will be quite a bit of detailed communications in the months ahead, when the time is appropriate, as we approach and prepare for closing and integration. While we understand the desire for answers is immediate, because of the nature of this transaction, these communications must be carefully planned and prepared. Information will be made available at the appropriate times as this process unfolds over the next many months. In the meantime, the companies will continue to be run independently with business as usual and we all must stay focused on delivering our business.

RSUs

- The vesting of half of the currently outstanding IDT RSUs that are scheduled to vest in 2021 and all of the currently outstanding IDT RSUs that are scheduled to vest in calendar year 2022 will accelerate and be converted into fully-vested equity awards (referred to as “One Yen Options”) in Renesas stock at the time of closing. Shortly after such conversion, you may elect to sell the underlying Renesas stock on the open market just like you are able to do with vested IDT stock, except that sales of Renesas stock will occur on the Tokyo Stock Exchange using an online brokerage account to be established at the time of closing.
- The remaining half of the currently outstanding IDT RSUs that are scheduled to vest in calendar year 2021 and all currently outstanding IDT RSUs that are scheduled to vest in calendar years 2019 and 2020, as well as any new IDT RSUs granted prior to closing, will convert to equity awards of equal value tied to Renesas stock (“One Yen Options”) at the time of close, with the same remaining vesting schedule as the original IDT grant.
- “One Yen Options” are similar to the IDT RSUs they replace except that each One Yen Option requires the holder to exercise the award in the year of vesting rather than the automatic vest and settlement associated with IDT RSUs. As part of the exercise, holders will pay an exercise price of one Yen (less than \$0.01 based on current exchange rates) with the exercise price refunded to the holder after exercise. Shares acquired upon exercise can then be sold on the Tokyo Stock Exchange through the online brokerage account.
- Both accelerated and un-vested IDT equity will be effectively converted at the deal price rate of \$49 per share.

Stock Options

- All outstanding IDT stock options, whether vested or unvested, will be cashed out at close based on the number of underlying shares multiplied by the excess of \$49 over the option exercise price.

ESPP

- The IDT ESPP plan will be suspended following completion of the current participation period ending in September 2018, and will be terminated immediately before the closing.
- The purpose of the ESPP plan has been to provide employees with another opportunity to participate in the growth in value of IDT shares. Since, IDT’s share price is now expected to be driven by the proposed transaction, with a fixed value, the plan cannot serve its intended purpose at this time.

AIP

- The AIP bonus for fiscal 2019 results will be paid out at the regularly scheduled time.
- If the fiscal year has completed before closing, achievement will be measured based on full year actual results.
- If the fiscal year has not completed before closing, achievement will be measured based on full year projected results.
